

## **1. STRUCTURE OF THE PUBLICATION**

Articles should be typed according to the structure and order shown below.

### **Title of the Article**

The title of the paper should be written on the top of the text, just in the middle of the page with capital letters (Times New Roman, size 14 and bold).

### **Name(s) of the Author(s)**

After the main title, author(s) name(s) and surname(s) with capital letters should be given with two line spacing (Times New Roman, size 14 and bold). In the case of more than one author, there should be comma between the author's names. Moreover, before the last writer's name "and" should be used instead of the comma.

### **1.3. Company/Institution Addresses**

After the author's names, the name of the company or institution should be supplied with a single space and centred (Times New Roman, size 12). If the writers do not work in the same company or institution, then their company or institution should be mentioned with 1, 2, 3 (as upper sign).

For example,

<sup>1</sup>Anadolu University, Department of Materials Science and Engineering,  
Eskisehir/Turkiye

<sup>2</sup>Dumlupinar University, Department of Ceramic Engineering, Kutahya/Turkiye

### **1.4. Abstract**

It should emphasise the main points of the study and restricted to 100 words. This part of the article is typed with three line spacing below the "Article Title". After the abstract, a few Keywords (bold) relating to the subject should be introduced.

### **1.5. The Main Part of the Article**

The details about this section are given under the title of **MAIN WRITING RULES**.

### **1.6. References**

The information about the cited references should be introduced according to the examples presented at the end of the instructions for the manuscript preparation. References should be given as [1]. If the writer's names are in the article, only the surname of the authors should be typed with the related reference number (like Kingery<sup>2</sup>). If there are two authors, authors surname should be distinguished with "and" (Taylor and Bull<sup>3</sup>). When there are more than two authors, then after the surname of the first author "et.all" should be used (Escardino et.all<sup>4</sup>). References should be defined accordingly.

### **1.7. Acknowledgements**

If necessary, this part should follow the main text of the article and appear before the references.

## **2. MAIN WRITING RULES**

The manuscript should be typed on A4 size paper and the margins of left are 4 cm, right, top and bottom 2.5 cm. The paper should be *a maximum of 16 pages* in length including all tables, figures and references with double line spacing, size 12, and Times New Roman. Bold characters should not be used apart from for the titles in the article. There should be single line space between the paragraphs. In the case of an attention to be made, the word or sentence can be written in italic forms. Page numbers should be typed at the bottom each page.

### **2.1. Headings**

Two types of headings will be used.

**2.1.1. Main Heading: ABSTRACT, INTRODUCTION, RESULTS AND DISCUSSION** headings will be written in capital letters (Times New Roman, size 12, bold) and numbered. There should be single line spacing above and below each heading.

**2.1.2. Subsidiary Headings:** They should appear with first letters being capital one (Times New Roman, size 12, bold) and numbered. Spaces should be similar to those of main heading.

**2.2. Figures and Tables**

Tables should be numbered and the related explanation written as seen below

**Table 1.** Dielectric and refractive index coefficients of amorphous materials

Component	Dielectric Constant ( $\epsilon$ )	Refractive Index (n)
SiO <sub>2</sub>	3.81	1.448
Flint glass	--	1.700
B <sub>2</sub> O <sub>3</sub>	--	1.485

**2.3. Figures, Graphs, Photographs**

All of the figures, graphs and photographs should be numbered and placed correctly in the text (Table 1, Figure 1 etc.) Related explanation about them should be typed below the figure/graph/photo.

**Figure 1.** Schematic illustration of grain boundary which formed by a third phase ( $\beta$ ) between ( $\alpha$ ) and ( $\gamma$ ) phases.

**Figure 2.** İznik Çini-ware.

Figures must be published by laser or inkjet printer. Those which are in photocopy form would not be accepted. Microstructure photographs should be placed in a similar manner like other photographs. Magnification must definitely be given with micron bar and other illustrations such as x1000 must not be used. The original publications of photographs should be placed in the original copy.

#### **2.4. Equations**

All of the equations should be written on the left-hand side of the page and there should be one single line spacing below and above. They should be numbered and the numbers be written in parenthesis lined on the right-hand side of the page.

$$\frac{1}{(d_{hkl})^2} = \left(\frac{h}{a}\right)^2 + \left(\frac{k}{b}\right)^2 + \left(\frac{l}{c}\right)^2 \quad (1)$$

#### **2.5. Footnotes**

Footnotes should be avoided if not necessary. Otherwise, they should be typed by using special signs (\*, \*,  $\Phi$  # etc) in the text. The corresponding footnote to the sign should be presented at the bottom of the same page. Footnotes should be remained in the restricted area of the text.

#### **Acknowledgments**

We would like to thank to people who helped the preparation of these instructions.
